

CLAIMS

The following is claimed:

- 1 1. A storage device for removably attaching to structures on a boat and for
2 storing items, the storage device comprising:
 - 3 a support member comprising marine fabric having two opposing sides on a
4 vertical longitudinal axis which are disposed in an oblique relationship to each other;
 - 5 at least one pocket member comprising marine fabric which is attached to the
6 support member for forming a pocket on the front side of the support member and for
7 receiving an item to be stored on the boat; and
 - 8 a plurality of straps attached to the support member in a substantially
9 perpendicular relationship to the longitudinal axis of the support member, each of the
10 plurality of straps having a first end for attaching to a first vertical structure and a
11 second end for attaching to a second vertical structure, the first and second vertical
12 structures being disposed in an oblique relationship to each other.
- 1 2. The storage device of claim 1, wherein the support member and the at least
2 one pocket member comprise an acrylic material.
- 1 3. The storage device of claim 1, wherein the support member and the at least
2 one pocket member comprise a woven vinyl-coated polyester fabric.
- 1 4. The storage device of claim 1, wherein the edges of the support member and
2 the pocket member are reinforced with an acrylic binding material.

1 5. The storage device of claim 1, wherein the plurality of straps comprise web
2 strapping.

1 6. The storage device of claim 1, wherein one of the plurality of straps is
2 positioned at the top of the support member and another of the plurality of straps is
3 positioned at the bottom of the support member.

1 7. The storage device of claim 6, further comprising:
2 a first pair of D-rings attached to the first end of one of the plurality of straps
3 for attaching the storage device to the first vertical structure; and
4 a second pair of D-rings attached to the second end of the one of the plurality
5 of straps for attaching the storage device to the second vertical structure.

1 8. The storage device of claim 1, wherein at least two pocket members are
2 attached to the support member to form two vertically-aligned pockets.

1 9. The storage device of claim 1, wherein at least two pocket members are
2 attached to the support member to form two horizontally-aligned pockets.

1 10. The storage device of claim 1, wherein the support member is sized to fit
2 between the first and second vertical structures to which the plurality of straps are to
3 be attached.

1 11. A storage device for removably attaching to structures on a boat and for
2 storing items, the storage device comprising:
3 a support member comprising marine fabric;
4 at least one pocket member comprising marine fabric which is attached to the
5 support member for forming a pocket on the front side of the support member and for
6 receiving an item to be stored on the boat; and
7 a plurality of straps attached to the support member along a vertical axis of the
8 support member, each of the plurality of straps for removably attaching the storage
9 device to a structure on the boat by extending a first end portion at least partially
10 around the structure along the vertical axis and attaching to the remaining portion of
11 the corresponding strap.

1 12. The storage device of claim 11, wherein the support member and the at least
2 one pocket member comprise an acrylic material.

1 13. The storage device of claim 11, wherein the support member and the at least
2 one pocket member comprise a woven vinyl-coated polyester fabric.

1 14. The storage device of claim 11, wherein the edges of the support member and
2 the pocket member are reinforced with an acrylic binding material.

1 15. The storage device of claim 11, wherein the at least one pocket member
2 comprises a portion of the support member which is folded and attached to the support
3 member to form the pocket.

1 16. The storage device of claim 15, wherein a plurality of pockets are formed by
2 stitching at least one divider in the at least one pocket member.

1 17. The storage device of claim 11, wherein the plurality of straps comprise web
2 strapping.

1 18. The storage device of claim 11, wherein at least one of the plurality of straps
2 further comprises a pair of D-rings for receiving the corresponding first end portion
3 and removably securing the storage device to the structure.

1 19. A storage device for removably attaching to a t-top on a boat and for storing
2 items, the storage device comprising:

3 a frame comprising marine fabric having an opening to a storage area defined
4 by the frame for receiving an item;
5 an access flap for enabling a user to access the storage area, the access flap
6 comprising marine fabric attached to a top portion of the frame and extending over the
7 opening to a bottom portion of the frame for securing the access flap to the bottom
8 portion of the frame; and

9 a plurality of straps attached to the bottom portion of the frame for providing
10 support from underneath the frame when it is attached to a t-top on a boat, each of the
11 plurality of straps having a first end for attaching to a first horizontal structure of the t-
12 top and a second end for attaching to a second horizontal structure of the t-top.

1 20. The storage device of claim 19, wherein the frame and the access flap
2 comprise one of an acrylic material and a woven vinyl-coated polyester fabric.

1 21. The storage device of claim 19, wherein the access flap further comprises a
2 means for removably attaching the access flap to the bottom portion of the frame.

1 22. The storage device of claim 19, wherein the plurality of straps comprise web
2 strapping.

- 1 23. The storage device of claim 21, further comprising:
 - 2 a first pair of D-rings attached to the first end of one of the plurality of straps
 - 3 for attaching the storage device to the first vertical structure; and
 - 4 a second pair of D-rings attached to the second end of the one of the plurality
 - 5 of straps for attaching the storage device to the second vertical structure.
